

# THE Advantage

## POST FRAME AN ENGINEERED WOOD BUILDING SYSTEM

For a low-rise engineered wood building system that combines value and efficiency, consider the Post-Frame Advantage:

**DESIGN FLEXIBILITY**—Post frame allows for open floor plans and a wide array of appealing architectural features.

**ENERGY EFFICIENCY**—Overall building energy savings are achieved through wood's natural thermal resistance and post frame's wide-column spacing, which means fewer insulation interruptions.

**DURABILITY AND STRENGTH**—A uniquely engineered post-frame system produces a long-lasting structure with outstanding resistance to wind and seismic forces.

**COST EFFECTIVE**—Dollar for dollar, post frame provides more building space than other types of construction.

**POST-FRAME  
ADVANTAGE**

For more information on using post frame for your building projects or to locate a post-frame contractor, please visit our website.
